Role Description: Senior Developer/Tech Lead- Bangalore

We are seeking a full-time **Senior Develope**r/**Tech Lead** with 5+ years of experience. As a Senior developer/Tech Lead, you will be responsible for designing, developing, and maintaining Salesforce solutions across departments while leading a team. You will handle end-to-end Salesforce project implementations, leveraging your expertise in Apex, Lightning Web Components (LWC), Service-Oriented Architecture, and Microservices.

Must-have skills: Salesforce, Manufacturing Cloud, and Lightning.

Required Skills:
- 5+ years of experience with Salesforce.
- Hands-on experience in **Manufacturing Cloud, Loyalty Management, and Rebate Management**.
- Strong expertise in **Rebate Management**.
- Proven experience in **Warranty Lifecycle Management within Salesforce**.
- Experience on Force.com platform using Apex, Lightning, Process Builders, and Flows.
- Strong hands-on experience with **Lightning Web Components (LWC)**.
- Deployment experience across environments.
- Familiarity with **CI/CD Pipeline and Git processes**.
- Good knowledge of **JavaScript, JSON, and system integrations**.
- Experience working with Lightning and design components.
- Strong background in Salesforce configuration, mapping features to business requirements.
- Proficiency in RDBMS and SQL queries.
- Hands-on experience in **Data Processing Engine and Data Migration (Data Loader Tool)**.
- Good understanding of **CRM Analytics**.
- Ability to evaluate requirements, research solutions, and ensure designs meet business needs.
- Experience creating proofs of concept and mock-ups.
- Contribution to improving team processes and delivery quality.
- Collaboration with offshore development teams.
- Partnering with QA for testing and issue resolution.
- Proven ability to **lead and manage a team effectively**.
